

# CommerceHealthcare® Payment Hub

## Power Up Your Vendor Payments

Payment Hub is a technology platform that streamlines vendor payment processing across all enterprise applications, payment types and banks. It enables hospitals and practices to gain significant efficiencies in invoice payment management, generate revenue and enhance supply chain processes.

## The Payment Hub Solution

Payment Hub optimizes all payments (card, ACH, check and specialty), supplier information, and creates a reconciliation file back to your ERP system. By fostering electronic payments, it provides a revenue share opportunity.

## How It Works

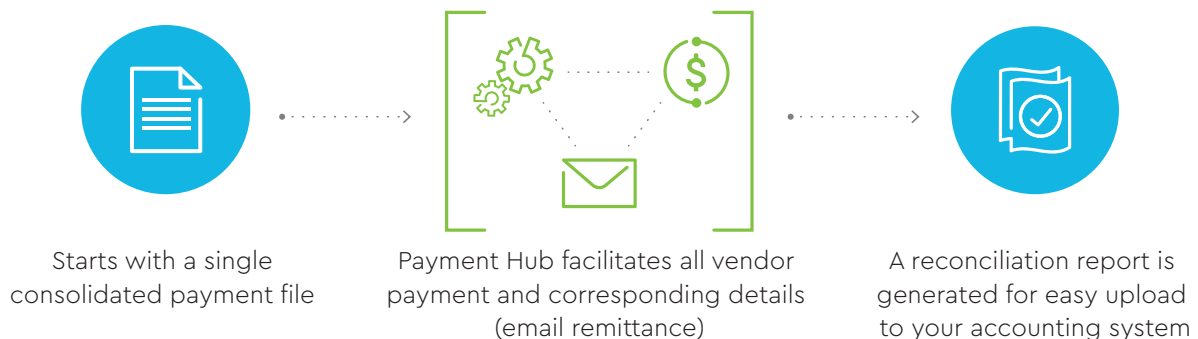

A dedicated team works diligently to enroll all your suppliers onto the network with their preferred payment options. The team maintains ongoing enrollment to capture vendor additions and changes.

“The rebates have provided additional operating revenue that Excela Health has been able to use to **support our mission of improving the health and well-being of every life we touch.**”

**- THOMAS ALBANESI, JR.**  
Executive Vice President/CFO,  
Excela Health

Then the power of payment automation takes over. Payment Hub consolidates individual payables into a single file, orchestrates the payments and corresponding details and automatically generates a reconciliation report transmitted to your accounting system. Throughout the process, Payment Hub captures and analyzes key information for reporting.

## How Payment Hub Works

## The Payment Hub Difference

- An integrated technology platform, not isolated apps or disparate tools.
- Supported by experienced CommerceHealthcare® professionals who ensure program quality and recommend enhancements.
- Backed by a leading bank offering financial stability and additional financial options, including a virtual AP Card as part of the Payment Hub solution.

Key Features	Benefits of Payment Hub
