**Notice to Staff**  
**about Immigration Enforcement**

We recognize that there are many questions about how the Federal government's immigration policies may affect hospitals and the patients we serve. We have put procedures in place to ensure that any requests or demands from the immigration authorities are handled professionally and appropriately.

This organization is deeply committed to respecting the privacy of our patients, employees, students, trainees, and other staff, regardless of their immigration status or that of their family members. Every action that we take, or decline to take, in response to law enforcement activity will be informed by that principle.

If you have any questions, please contact \_\_\_\_\_.
